Hyderabad, India | +91 6302443671 | dhirajshahani90@gmail.com

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with experience building secure, scalable microservices-based web applications using Spring Boot, REST APIs, React.js, MySQL Server, and Node.js. Specialized in Two-Factor Authentication and cryptographic security (SHA-256, JWT). Proven ability to architect and deliver end-to-end solutions across web, and cloud platforms. Seeking a Full Stack or Backend Developer role.

TECHNICAL SKILLS

Backend	Java, Spring Boot, Microservices, REST APIs, JSP, JDBC, Servlet, Node.js, JPA, Hibernate
Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive UI Design, Component-Based Architecture
Database	MySQL Server, SQL Queries, Schema Design, Normalization, NoSQL
Tools	Apache Tomcat, Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code
Methodology	MVC Architecture, Microservices, RESTful API Design, OOPs, JUnit, CI/CD (basic)

INTERNSHIP EXPERIENCE

Java Backend Intern Jun 2025 – Nov 2025

DataPoint

- Developed and maintained backend modules using **Core Java, Spring Boot, JDBC, REST APIs, and MySQL** for a secure Two-Factor Authentication (2FA) platform supporting 500+ test users.
- Implemented authentication and authorization features using SHA-256 encryption, JWT tokens, TLS security, and RSA-based secure QR key exchange for secure user validation.
- Designed **RESTful APIs, optimized SQL database** operations, and integrated backend services with React.js frontend, Flutter mobile application, and Node.js cloud services.
- Applied OOP concepts, debugging, exception handling**, secure coding practices, API integration, and Agile development methodology using Git version control.
- Improved application security against brute-force attacks, **phishing, DDoS, MITM, and keylogger threats** through rate limiting, session management, and cryptographic controls.

Java Developer Intern (Virtual) Jan 2024 – Feb 2024

Systecks Solutions

- Built 3 desktop GUI applications using **Java and JavaFX**, applying **OOP principles (inheritance, encapsulation, polymorphism)**.
- Debugged and delivered functional software modules within a 4-week intensive virtual program, demonstrating self-directed adaptability.

PROJECTS

College Management System 2026

Tech Stack: Java, Spring Boot, Microservices, REST APIs, MySQL Server, React.js, Maven, Postman, Git

- Developed a full-stack web application to manage students, faculty, courses, attendance, and academic records.
- Designed and implemented **RESTful APIs using Spring Boot** and Spring Data JPA.
- Built **responsive user interfaces using React.js** for seamless user interaction.
- Integrated MySQL database with Hibernate/JPA for efficient data management.
- Implemented role-based **authentication and authorization for Admin, Faculty**, and Student modules.
- Optimized database queries and application performance through layered architecture and reusable service components.
- Utilized Git for version control and collaborative development.

Two-Factor Authentication — Novel OTP Algorithm 2025

Tech Stack: Java, Spring Boot, JSP, JDBC, MySQL, Flutter, React.js, Node.js, JWT

- Built a secure full-stack authentication system using Java, Spring Boot, JDBC, MySQL, and JWT for **secure login and user authentication workflows**.
- Developed OTP authentication using **SHA-256 hashing**, Unix timestamp validation, RSA-encrypted QR key exchange, and TLS-based secure communication.
- Integrated backend services with Flutter, React.js, and **Node.js platforms through REST API** integration and secure session handling.
- Applied penetration testing, debugging, vulnerability analysis, and secure coding practices to **prevent brute-force, phishing, DDoS, MITM, and keylogger attacks**.

EDUCATION

Master of Computer Applications (MCA)

St. John's PG College, Osmania University

Graduated: 2025 | CGPA: 8.2 / 10

B.Sc. Computer Science

Rainbow Integrated Degree College, Osmania University

Graduated: 2023 | CGPA: 8.6 / 10
